WORLD NEWS

...DAB/DAB-IP/DVB-T/T-DMB RECEIVER FOR PC IN ONE UNIT!

BlueTinum® is proud to present another world premiere!! ... One USB dongle for PC that combines: DAB/DAB-IP/DVB-T/T-DMB - all in one unit combination!...

Now BlueTinum® combines both digital Radio and TV for your PC in one and same unit. This means that now you have the option of listening to DAB radio or watch DVB-T on your PC. All combined in same unit that furthermore is very small and compact. With the user-friendly software included it is easy to switch between DAB and DVB-T. Off course with Teletext function and DVB subtitle support and with the external antenna included you are ready to listen to digital radio or watch digital TV whenever and wherever you want.

DAB digital
Radio

DVB-T

BlueTinum® presented this radio at the IFA Electronics Fair in Berlin October 2007 and this will also be shown at AsiaWorld-Expo in Hong Kong from October 12-15 / 2007 (Booth no. 6P29).

BlueTinum® wants; with this new series of innovative products, to be one of the leading suppliers within the combination of different technologies for audio/video products.

The retail price for the BT-H1518 DAB/DAB-IP/DVB-T/T-DMB USB receiver is expected to be around EUR€ 54.99 in retail stores around Europe, and is expected to hit the market for Christmas 2007.
